-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 01 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. **Claim 4** recites the limitation "other openings" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4** are rejected under 35 U.S.C. 102(b) as being anticipated by **Puls (US 6,212,284)**.

Regarding claim 1, In **figure 4**, Puls teaches a compound sound generator for an information equipment comprising: a case **40** of the equipment; 5 a frame **13'** set in the case; a speaker and receiver provided in the frame, the speaker having a first diaphragm **15** and the receiver having a second diaphragm **15'**; a first back chamber **37'** behind the first diaphragm **15** of the speaker and a second back chamber behind the second diaphragm **15'** of the receiver; and a baffle (*see the inner-most wall of*

Art Unit: 2646

**conduit-34)** formed integrally with the frame **13'** so as to separate the first **37'** and second **29'** back chambers from each other.

Regarding claim 2, Puls teaches that the baffle (*see in the inner-most wall of conduit 34*) is provided to surround the outside of the second diaphragm **15'** of the receiver, and to form an annular space **30'** to communicate with the second back chamber **29'** of the receiver *via opening 31'*.

Regarding claim 3, Puls teaches that the first back chamber **37'** of the speaker is opened to a conduit formed by an inner wall, integral with frame **13'** which reads on "space between the outside wall of the baffle" and formed by an inner wall which is integral with outer wall **40**, which reads on "and the inside wall of the case".

Regarding claim 4, Puls teaches that at least one of the first back chamber **37** of the speaker **15** and the second back chamber **29'** of the receiver **15'** is opened to the Outside of the case *via sound guidance conduit 34* at a position different from other openings.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2646

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. **Claims 1-4** are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-5 of copending Application No. 10/677,358. Although the conflicting claims are not identical, they are not patentably distinct from each other because of obvious wording variations. For example, the immediate application recites, in claim 1, "a baffle formed integrally with the frame...", while claim 1 of U.S. Application 10/677,358 recites "a baffle formed on a part of the frame...".

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
